THE DEPARTMENTS IN THE FACULTY::

- [Information technology.](#)
- [Decission department.](#)
- [software engineering.](#)
- [Information system.](#)
- [computer science.](#)

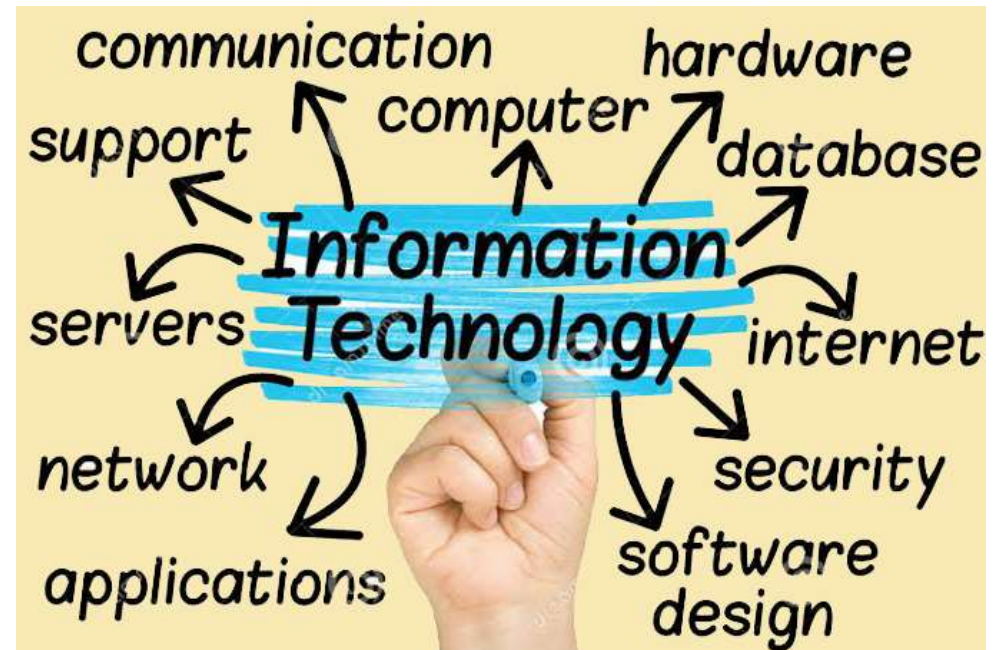

- *Binformatics.*

Computer Science::

is a field that emphasizes both computing and informatics, upholding the strong association between the fields of information sciences and computer sciences and treating computers as a tool rather than a field. Information science is one with a long history, unlike the – relatively – very young field of computer science, and is primarily concerned with gathering, storing, disseminating, sharing and protecting any and all forms of information.

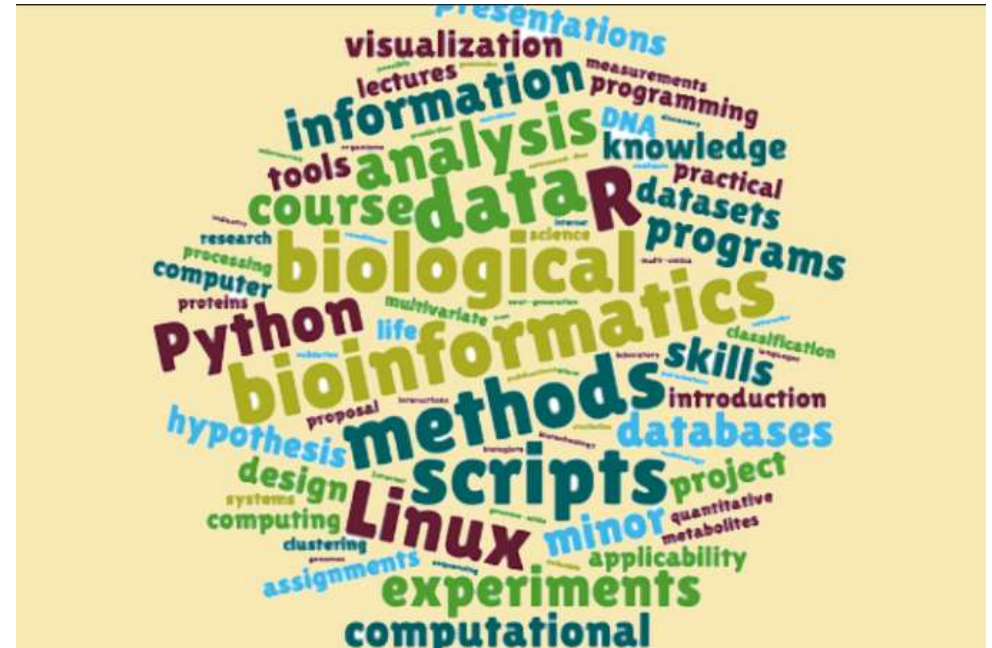

Information technology::

is the application of computers to store 'study' retrieve 'transmit and manipulate data' or information often in the context of business or other enterpress.

IT is considered a subset of information and comunication technology(ICT).

Binformatics.::

is an interdisciplinary field that develops methods and software tools for understanding biological data. As an interdisciplinary field of science ,
bioinformatics combines computer science , statistics , mathematics , and engineering to analze and interpret biologic data.

Information system.::

*is an organized system for the collection , organztion , storage and communcation of information more soecifically, it is the study of
complementary
networks that people and orgnztions use to collect,filter process, create and distribute data.*
